### Profile

Hello

Thanks for reading my resume.

I have worked as a programmer for over 4 years now and have full experiences on the web development.

Please share with me with your projects and that is done with no problem.

My first range of work is Web development.

Here I will share my previous works with my clients before for over 4 years.

My first experience on web development is with PHP frameworks like Magento/CI/Laravel.

I worked on them as a part time freelancer for over a year.

Then, I have joined as a team member of an international freelancer's team to develop a Shopify template.

Here is the url

<https://www.sparkleinpink.com>

<https://www.harleymedical.co.uk/>

Also worked as a wordpress programmer with websites like

<http://www.fitforlifewellnessclinic.com/>

<https://www.masmusculo.com/en/>

Currently I am working on frontend design development with JS like react/vue/angular.

Plus the range of mine is the cryptocurrency.

Nowadays the movement towards the Metamask flows widely and I am interested on this subject too.

But just learning to do this.

Plus my second range is language.

I have been studying English as my foreign language for over 15 years, so my English level is just like native speakers.

My clients usually love chatting with me and to talk with.

Also the range includes languages like Chinese and Japanese.

Please feel free to contact me at any time you need me.

Thank you so much for reading my short biography.

:)

## **Education**

### **Master's degree, Murmansk State Technical University**

September 2012 – September 2016

I have graduated MSTU.

There I have studied computer science for four years.

And get Master's Degree of computer science there.

Love my University and love to recall back all activities there.
